PROFESSIONAL SUMMARY

Software Engineering graduate from Debre Markos University with practical experience developing web and mobile applications through an internship, collaborative work, and academic projects. Experienced with React.js, JavaScript, REST API integration, databases, and software testing. Familiar with C# and ASP.NET Core, with foundational knowledge of Java and Python. Practiced Python basics by experimenting with simple Telegram bots. Ready to contribute to development, troubleshooting, documentation, and team projects while continuing to learn.

TECHNICAL SKILLS

Programming	**JavaScript, C#, Dart**; basic Java and Python
Java	Foundational syntax and code structure; studied through university coursework and independent learning
Python	Basic syntax and practice experimenting with simple Telegram bots
OOP Fundamentals	Classes and objects, inheritance, encapsulation, polymorphism, and abstraction
Web / Backend	React.js, HTML, CSS, Bootstrap, Node.js, ASP.NET Core, REST APIs
Databases	PostgreSQL, SQL Server, MongoDB
Tools	Git, GitHub, Postman, Visual Studio Code, SQL Server Management Studio, Microsoft Office (Word, Excel, PowerPoint)

PROFESSIONAL EXPERIENCE

Software Developer Intern | Yod Business Solutions

March 2025 – December 2025 | On-site

- Developed reusable React.js user-interface components and integrated frontend features with REST APIs.
- Investigated application bugs and supported improvements to existing features and usability.
- Participated in software testing, code reviews, and collaborative development activities.

Web & Mobile Developer | Atlas Company

April 2025 – July 2025 | Remote

- Developed responsive web application features using React.js and mobile functionality using Flutter.
- Worked remotely with team members to coordinate tasks and contribute to project milestones.

EDUCATION

Bachelor of Science in Software Engineering — Debre Markos University

2021 – 2026 | CGPA: 3.60 / 4.00

CORE COMPETENCIES

- Problem-solving & analytical thinking
- Teamwork & communication
- Software testing & debugging
- Documentation & reporting
- Task coordination
- Willingness to learn

SELECTED PROJECTS

HR Management System

React.js, ASP.NET, SQL Server

Developed employee and attendance management modules for a database-driven HR application.

License Generation Application

React.js; ASP.NET and PostgreSQL backend collaboration

Developed responsive frontend interfaces and collaborated with teammates using Git and GitHub.

SELECTED PROJECTS — CONTINUED

University Digital Election Platform
React.js, Node.js, PostgreSQL
Contributed to candidate management, voting functionality, and database operations for a university election platform.

Ride-Sharing Web Application
React.js, ASP.NET, PostgreSQL
Developed ride-booking and management functionality with responsive user interfaces.

GymChat Mobile App
Flutter
Worked on authentication, messaging, chat interfaces, and state-management functionality.

Lost & Found Mobile App
Flutter
Developed mobile interfaces for reporting and tracking lost and found items.

CERTIFICATIONS & PROFESSIONAL TRAINING

Microsoft Azure AI Engineer Training and certification	**ISC2 Certified in Cybersecurity (CC)**	**HCIA-Datacom** Networking fundamentals; routing and switching concepts
Udacity Fundamentals of Programming	**Simplilearn** Git Fundamentals / Version Control	

LEADERSHIP & PROJECT COORDINATION

- Led university group projects by coordinating teammates, assigning responsibilities, monitoring progress, and keeping tasks aligned with requirements and deadlines.
- Applied communication, planning, and problem-solving skills throughout collaborative software development projects.
- Comfortable learning independently, asking questions, and adapting to new tools and technical requirements.

ADDITIONAL SKILLS RELEVANT TO Pioneer

Interested in contributing to software development, application testing and maintenance, basic IT troubleshooting, website and system updates, technical documentation, and communication with team members and clients.
